Mobile number - 07889274109

Email - lukasburton.1401@gmail.com

Address - 2 Newberry close, Cropwell Bishop

Postcode - NG123DY

Profile

Graduate student of a computer science for games course, who collaborates well in teams and is a great people person as illustrated through the development of projects with close associates and further shown by my level one archery coaching award. I am looking to join (enter appropriate company) for a placement year to broaden my knowledge and experience.

Qualifications

University – Sheffield Hallam University

Results – second class honours second division

Modules; programming things, project (technical computing), advanced games console projects

Collage - Confetti Institute of Creative Technologies

BTEC grades – MMP

Grades – all GCSE grades A to C including; English 4/C, maths 6/B science 5/C

Secondary school - Toot Hill school

Experience

- Cake Decorating Company. I complete picking orders which involve the collecting of different products located in the warehouse, these items would then be placed on the packing bench to be packed. While working at this establishment I handled various machines and devices such as, the shrink wrap machine and other devices.
- Earl of Chesterfield. I was a pot washer at this restaurant where I completed various tasks like washing pots cleaning surfaces, I was also entrusted locking up the restaurant on nightshifts.
- Sue Ryder. A small charity shop that I performed volunteer work in where I executed the following, working at the till and serving customers while, helping behind the counter to lift heavy objects and restock the shelves when empty.

Skills

- I have many skills that I believe correspond well with the duties I will be fulfilling while working at (company name).
- First of all, I collaborate well in teams and I am a great people person as illustrated through the development of projects with close associates and further shown by my level one archery coaching award I achieved recently. This can also be used to show my comprehensive communication skills which I will use to help my co-workers work more efficiently.
- throughout university I have used Unity and C++ to create various projects like Necopinatus, during my time there I also worked with in a team to port Zool to a vulkan so that in the future it can function on the nintendo switch. I am also adept in the use of the unreal engine which I have used to make various projects both recreational and as a team working on the development of a fully-fledged game. This boasts my communication skills and dedication.
- I have a logical way of thinking which allows me to find the best route to take when solving any issues or when creating a game. This is applied when skiing as I would need to plan out my route my day and also find the best path to take down the hill.

Interests

I have been performing archery for eight years and I am still enjoying it. During this time, I have won the junior national championship three years in a row, and I have recently completed a level one coaching course, which allows me to teach others the joy of archery. While completing this I took a child protection course which allows me to identify when a child is being abused and what to do when this is seen, I believe this and be implemented into games development as many children play video games. I enjoy playing various games and deciphering different systems that I find interesting; I also

enjoy recreating these systems in unreal to find ways to improve and destroy the mechanic while testing its limits. I also enjoy skiing where I have travelled to various snow domes and been on holidays to enjoy this sport.
